DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed June 14, 2005 have been acknowledged.
2. Examiner acknowledges amended claim 2.
3. The rejection of claim 2 under 35 U.S.C. 112, second paragraph is withdrawn due to applicant's amended claim 2.
4. The rejection of claims 1-4, 6-8 and 12 under 35 U.S.C. 102(a) as being anticipated by JP 2002-308837 is withdrawn due to applicant's argument.
5. The rejection of claims 1 and 9-11 under 35 U.S.C. 103(a) as being unpatentable over JP 2002-308837 in view of Thoms et al., U.S. Pre Grant Publication 2003/0205696 is withdrawn due to applicant's argument.
6. The rejection of claims 1-12 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over U.S. Patent Application 10/718,025 is withdrawn due to applicant's submission of the terminal disclaimer.

Specification

7. Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means"

and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

8. Claim 2 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

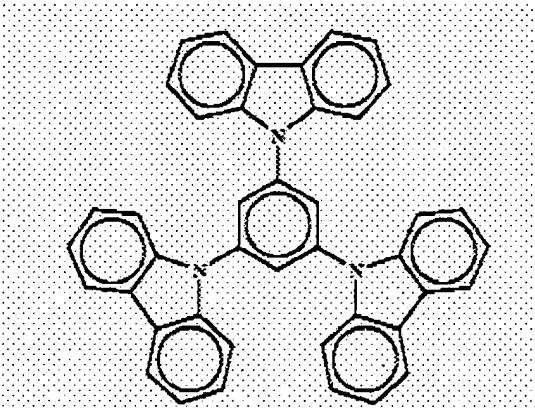

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

10. Claims 1-4 and 6-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Thoms et al., U.S. Pre Grant Publication 2003/0205696.

Thoms discloses a guest-host system emissive system used in organic light emitting devices.

Paragraph 0012 of the reference discloses that the host is a carbazole based compound having a structure

, which has a two-fold axis of symmetry. The carbazole based compound has a benzene core that is linked by a chemical bond as per instant claims 4 and 6-8. Thoms also discloses that the guest emissive material can be tris(2-phenylpyridine)iridium as per instant claims 1 and 9-11 (see paragraph 0015).

11. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not provide for the recited electroluminescent element, further including at least z has a chemical structure different from that of another Z .

Response to Arguments

12. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.
